

## ANVIL VISES

**6519-520**

- The vise is used to fix workpieces during machining.  
The anvils are formed according to the shape of workpieces to be fixed, so the vise can fix workpieces quickly.
- The anvils are made of stainless steel (HRC20), can be customized to carbon steel (HRC40-45)
- Diameter of anvil: 6mm, stroke of anvil: 24mm
- Movement range of rotary clamp: 0-50mm

| Code            | Guide length (L) | Clamp range (W) | Clamp force* | Weight | a     | b    |
|-----------------|------------------|-----------------|--------------|--------|-------|------|
| <b>6519-520</b> | 520mm            | 0-190mm         | 6500N        | 22.5kg | 100mm | 30mm |
| <b>6519-680</b> | 680mm            | 0-320mm         | 8000N        | 39.5kg | 120mm | 36mm |

\* When all anvils contact the workpieces

application
